### PART A: THE GUIDANCE NOTE

### 1. INTRODUCTION

- 1.1. **GBVF** is a profound and widespread problem in South Africa, impacting on almost every aspect of life. **GBVF** which disproportionately affects women and girls, is systemic and deeply entrenched in institutions, cultures and traditions in South Africa.
- 1.2. The expectations associated with different genders vary from society to society and over time. Patriarchal power structures dominate in many societies, in which male leadership is seen as the norm, and men hold the majority of power. Patriarchy is a social and political system that treats men as superior to women where women cannot protect their bodies, meet their basic needs, participate fully in society and men perpetrate violence against women with impunity.
- 1.3. South Africa holds the distinction of being one of the most unsafe places in the world for women, with the highest rates of intimate partner violence. Recent data from Statistics South Africa (StatsSA) show that rape and sexual violence have become a hyperendemic. This is a scourge that affects all females irrespective of age, race, social or economic factors. It pervades every sphere of our society.
- 1.4. In 2019, the government established an interim steering committee on GBVF to develop a monitoring framework on the immediate response to the GBVF crisis in South Africa. The NSP was completed and released on 21 September 2019. The framework highlights a number of interventions by Government for the adoption and implementation by various stakeholders within Government, the public and the private sector of South Africa.
- 1.5. The Mine Health and Safety Council (MHSC) mandated a study in 2013 to conduct research on the safety and security challenges impacting on women in the South African mining industry. Qualitative findings showed that the negative attitudes, harassment and discrimination experienced by **WIM** are indeed barriers to the effective integration of women in the sector. This study showed that:
  - Violence and sexual harassment is a recurrent problem for and a threat to the health, safety and security of female workers in the South African mining industry.
  - Policies and procedures for the managing of violence and sexual harassment were either non-existent or where it existed were obsolete and ineffective.
  - Physical violence and sexual harassment at work, particularly at the mines, should be recognised as a serious prevalent problem requiring specific regulatory interventions.
- 1.6. The recommendations of the study (SIM 130903: Safety and security challenges impacting women in the South African mining industry) were that effective prevention and management of workplace violence and sexual harassment in the mines, warrants the adoption, implementation and monitoring of robust multi-faceted preventive measures at primary, secondary and tertiary levels of prevention. Also, prevention strategies should include a combination of workplace policies and procedures based on a sound legislative, regulatory and enforcement framework. Good practices require

organisations to emphasise the primary prevention by adopting proactive interventions that include raising awareness and training programmes with the participation of men, possibly as champions.

1.7. To adopt and implement strategies to address the abovementioned challenges in the South African mining industry, WIMAC identified a number of interventions as an immediate response to the crisis of the GBVF, safety and security challenges facing women in the mining industry as well as the surrounding communities. This includes the implementation of the NSP on GBVF in the mining sector and reporting thereon.

### 2. SCOPE

2.1. This guidance note applies to the South African mining industry as well as the mining communities.

### 3. STATUS OF THE GUIDANCE NOTE

3.1. The guidance note was compiled specifically with the view to provide guidance to all stakeholders regarding their roles and responsibilities with reference to the management of **GBVF**, safety and security of women in the mining industry.

### 4. OBJECTIVE OF THIS GUIDANCE NOTE

4.1. The objective of this guidance note is to provide guidance to the employer at every mine in addressing **GBVF**, safety and security issues for women in the South African mining industry.

### 5. **DEFINITIONS AND ACRONYMS**

- 5.1. **DMRE** means Department of Mineral Resources and Energy.
- 5.2. **GBVF** means Gender-based Violence and Femicide.
- 5.3. **NSP** means National Strategic Plan on **GBVF**.
- 5.4. **WIM** means Women in Mining, i.e. female employees working at mines and this may include Women in the Mining Communities where applicable.
- 5.5. **WIMAC** means Women in Mining Advisory Committee.

### 6. MEMBERS OF THE TASK TEAM

6.1. This document was prepared by members of the **WIMAC** Task Team which comprised of:

	CHAIRPERSON	
	Ms FB Senabe	
STATE	EMPLOYERS	ORGANISED LABOUR
Ms. M. Mokwena	Ms. L. Tsele	Ms. C. Van Aswegen-Pienaar
Adv. G. Masilo	Ms. Y. Chetty	Adv. J.P. Jansen Van Vuuren
	Ms. T. Mangope	
	Ms. N. Molelekeng	

### 7. ASPECTS ADDRESSED IN THE GUIDANCE NOTE

- 7.1. The guidance note sets out how **GBVF**, safety and security challenges for **WIM** are identified and addressed. The guidance note should at least cover the aspects set out below to ensure that **GBVF**, safety and security challenges are fully managed and eradicated in the South African mining industry.
- 7.2. Roles and responsibilities of different person(s)
- 7.2.1. The guidance note sets out the roles and responsibilities of the various persons involved in the processes to ensure **GBVF**, safety and security challenges for **WIM** are managed at the mine. These roles and responsibilities should include incident reporting on **GBVF** by the mine, but is not limited to the following:

### 7.2.1.1. **Employer**

- 7.2.1.1.1. The employer(s) shall commit to ensure zero tolerance to **GBVF** in the workplace and are required to do the following:
  - a) Take ownership and accountability for the implementation and reporting on the **NSP** on **GBVF**, focusing on the following pillars or areas:
    - i) Pillar 1: Accountability, coordination and leadership.
    - ii) Pillar 2: Prevention and rebuilding social cohesion.
    - iii) Pillar 4: Response, care, support and healing.
    - iv) Pillar 6: Research and information systems.
    - v) Pillar 7: 16 Days of No Violence Against Women and Children campaign.
  - b) Develop and operationalise **GBVF** related policies or strategies or implementation plans to address the following:
    - i) Sexual harassment.
    - ii) Gender discrimination (including exclusion from certain positions of economic and financial significance).
    - iii) **GBVF** (including emotional abuse, bullying and physical abuse).
  - c) Report on **GBVF** using Annexure C: Summary report safety and security challenges impacting **WIM** in the South African mining industry of this guidance note on the following:
    - Development and implementation of GBVF policies (each mine must have a sexual harassment policy which must be displayed on notice boards).

- ii) Development and implementation of **GBVF** plans.
- iii) Establishment of a **GBVF** disaggregated database.
- iv) Collaboration with the criminal justice system to ensure that victims have access to those services.
- v) Observance of the 16 Days of No Violence Against Women and Children campaign.
- d) Establish **GBVF** management structures and systems that includes the following:
  - i) Gender focal persons (e.g. sexual harassment ambassadors) that deal with **GBVF** matters.
  - ii) Relevant employee health and wellness services.
  - iii) A gender monitoring and evaluation committee (the **WIM** forum may serve in this capacity).
  - iv) The provision of properly illuminated ablution facilities that are lockable from the inside and change rooms that are specific for **WIM** in all the working areas.
  - v) On site **GBVF** (including sexual harassment) reporting systems allowing for the provision for anonymity and further investigation of the incident.
  - vi) Utilising best practices such as the buddy system and the use of mobile radios to increase the security of **WIM**.
  - vii) Employers should implement **GBVF** programmes in line with the pillars of the **NSP** to ensure wellbeing/ wellness for employees.
- e) Separate the victims from the perpetrators at the workplace.
- f) Address the drivers behind the **GBVF** incidents encountered at the workplace.

### 7.2.1.2. Managers and supervisors

- 7.2.1.2.1. Managers or supervisors should familiarise themselves with policies and procedures pertaining to **GBVF** management and should:
  - a) Ensure that the safety and security of women is upheld at the mine (e.g. buddy-buddy system).
  - b) Participate in **GBVF** management training and the implementation thereof.
  - c) Adhere to the policies and processes to manage **GBVF** in the workplace.

- d) Report on the progress made regarding the management of **GBVF** and the implementation of existing policies and plans annually.
- e) Refer victims of gender-based violence to the employee health and wellness programme including mental wellness issues and support systems or centres.
- f) Ensure that systems to address the safety and security of WIM are in place and are periodically reviewed or assessed including the monitoring and reporting of progress.
- 7.3. Policies and procedures on **GBVF** management
- 7.3.1. The guidance note sets out measures to ensure that policies and procedures to manage GBVF, safety and security challenges for WIM are developed, implemented, monitored and reported on. The measures should include:
- 7.3.1.1. Identifying priority areas for policy development or the review in relation to **GBVF** management at the workplace.
- 7.3.1.2. Displaying the developed sexual harassment policies and procedures on notice boards and other appropriate media.
- 7.3.1.3. Indicating the dates on which the policies and procedures were developed or reviewed.
- 7.3.1.4. Assessing the impact of policies and procedures in order to improve **GBVF** management at the workplace.

### 7.4. Training

- 7.4.1. Training shall be aimed at strengthening and delivering capacity to roll out effective prevention and management programmes for **GBVF**, safety and security issues at the mine. All formal training must be documented and should comply with the relevant provisions of the Mine Health and Safety Act, 1996 (Act 29 of 1996) as amended. This training shall also include the following focus areas:
- 7.4.1.1. Gender mainstreaming for managers (including governance issues, gender responsive budgeting as well as national and sector specific focus areas).
- 7.4.1.2. **GBVF** including sexual harassment should be a standing item on the induction programmes of the mines (including the proper use of existing reporting systems).
- 7.4.1.3. Survivor focused response, care and support programmes at the workplace for employees who are victims of **GBVF** shall be extended to employees who decide to leave the company because of a **GBVF** encounter. Employers are encouraged to participate in and collaborate with surrounding communities in multi-sectoral programmes to address **GBVF** in line with the **NSP**. These programmes shall facilitate the recovery and the healing of the affected employees.

### **PART B: IMPLEMENTATION**

### 1. IMPLEMENTATION PLAN

- 1.1. The employer must prepare an implementation plan for its guidance note for provision of issues such as organisational structures, responsibilities of functionaries and, programmes and schedules for the guidance note that will enable proper implementation of the guidance note. (A summary of and a reference to, a comprehensive implementation plan may be included).
- 1.2. Information may be graphically represented to facilitate easy interpretation of the data and to highlight trends for the purposes of risk assessment.

### 2. COMPLIANCE WITH THE GUIDANCE NOTE

2.1. The employer must institute measures for monitoring and ensuring compliance with the guidance note.

### 3. ACCESS TO THE GUIDANCE NOTE AND RELATED DOCUMENTS

- 3.1. The employer must ensure that a complete guidance note, and related documents are readily available at the mine for examination by any affected person.
- 3.2. A registered trade union with members at the mine or where there is no such union, a health and safety representative at the mine, or, if there is no health and safety representative, an employee representing the employees at the mine, must be provided with a copy of the written request to the manager. A register must be kept of such persons or institutions with copies to facilitate updating of such copies.
- 3.3. The employer must ensure that all employees are conversant with those sections of the guidance note relevant to their respective areas of responsibilities.

### PART C: MONITORING AND EVALUATION

### 1. SUBMISSION OF GBVF ANNUAL REPORTS TITLE PAGE

1.1. All mines should develop and submit a **GBVF** implementation plan on the last day of the month of February annually. These should be followed through by the submission of the progress report of the previous year (Annexure E: Progress reporting template: **NSP** Strategic Plan on **GBVF**).

### ANNEXURE C: SUMMARY REPORT – SAFETY AND SECURITY CHALLENGES IMPACTING WIM IN THE SOUTH AFRICAN MINING INDUSTRY

(For information purposes only)

Safety In Mines Research Advisory Committee

### PROJECT SUMMARY: SIM 13 09 03

PROJECT TITLE:	Safety and Security Challe Mining Industry	nges Impacting on Won	nen in the South African
AUTHORS:	Zungu LI	AGENCY:	University of South Africa
DEDODT DATE	20 November 2014	DELATED	Nama
REPORT DATE:	30 November 2014	RELATED PROJECTS:	None
CATEGORY:	Occupational Health and Safety	APPLIED RESEARCH:	Yes

### Summary:

Historically, the mining industry has attracted a workforce made up of mainly men (Badenhorst 2009; Zungu 2012). However, in the recent past there has been a sturdy flow of women into the industry which came about as a consequence of a regulated process. In light of the fact that the mining industry was the domain of men at the exclusion of women there was a need for some interventions to facilitate access to the industry for women.

The primary purpose of this project was to develop guidelines to assist the South African mining industry to adopt and implement robust and effective prevention strategies of violence and sexual harassment as important safety and security challenges faced by women in the South African mining industry.

As a preliminary step within this project, a review of both local and international predecessor research outcomes was conducted. Secondary to this, a quantitative cross-sectional descriptive survey was conducted in the mines, using a structured questionnaire and participant observations across three study sites of different commodities, namely, Gold, Platinum and Coal mines. In-depth interviews and focus group discussions were conducted with men and women to deepen the understanding of the nature and circumstances of violence and harassment in the mines.

A total of 262 participants from the Platinum (98.0%), Gold (1.6%) and Coal (0.4%) sectors were involved in the quantitative survey. Findings showed that working shifts was associated with experiences of physical violence (p=0.037), verbal

associated with quid pro quo sexual harassment (p=0.008). Years of working experience in the mines were associated with unwanted verbal abuse (p=0.003). Lastly, the place (p=0.001) and time (p=0013) of the incident of violence was related to the perpetrator. Qualitative findings showed that the negative attitudes, harassment and discrimination experienced by women in mining are indeed barriers to women's effective integration in the sector.

This study shows that:

- Violence and sexual harassment is a recurrent problem for and a threat to the health, safety and security of female workers in the South African mining industry.
- Policies and procedures for managing violence and sexual harassment were either non-existent or where they existed were obsolete and ineffective.
- Physical violence and sexual harassment at work, particularly in the mines should be recognised as a serious prevalent problem requiring specific regulatory interventions.

It is recommended that effective prevention and management of workplace violence and sexual harassment in the mines, warrants the adoption, implementation and monitoring of robust multifaceted preventive measures at primary, secondary and tertiary levels of prevention. Also, prevention strategies should include a combination of workplace policies and procedures based on a sound legislative, regulatory and enforcement framework: good practice requires organisations to emphasise primary prevention by adopting proactive interventions that include raising

abuse (p=0.031) and bullying (p=0.012) indicating	awareness and training programmes with the
that those working in shifts were twice more likely	participation of men, possibly as champions.
to experience physical violence, verbal abuse and	
being bullied at work.
